

EXPERIENCE THE DIFFERENCE.

Tampa Data Center

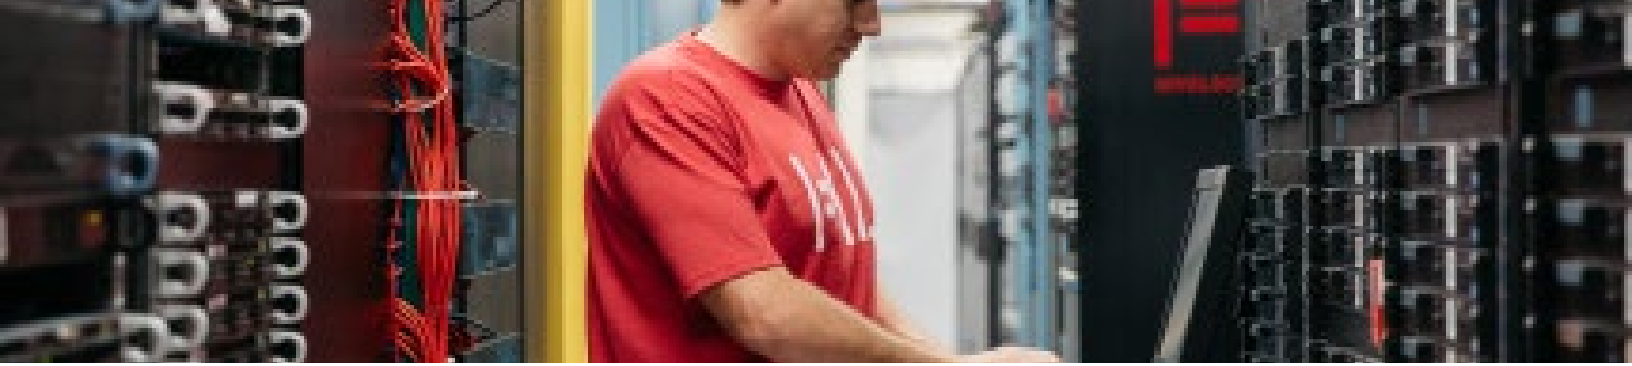

OUR ROOTS

Hivelocity began in 2001 as a provider of managed hosting solutions. In the beginning we had one server cabinet in a closet. During this time it was our expertise that attracted customers from around the world. Not our facilities.

Currently we own and operate over 60,000 square feet of world class data center space. And to this day it is still our expertise, innovation and professional services that set us apart. If you are looking for a big, cold building with lots of redundant power, you have a lot of options. If you are looking for a big, cold building with lots of redundant power, 100% uptime and a 24/7 on-site team of experts—that knows more about servers, cloud & networking than anyone in town—then Hivelocity is where you want to be.

Here are a few more reasons Hivelocity is a better place to collocate...

01 / OUR SERVICES

So much more than just power and pipe. As a full service hosting provider we possess a unique set of skills and offerings not matched by our competitors.

Our services range from:

Colocation, Dedicated Servers, Virtual Servers, Private Cloud, Hybrid Environments, Backup and Recovery, Disaster Recovery, Managed Services, Metro-E, IP Transit, and Hardware Procurement.

02 / OUR NETWORK

Will outperform the network of any other data center in town and most around the country. Every customer—including colo—receives our IRP blend of 8 transit providers and 4 peering fabrics. Our base network was designed to perform for our customers from over 130 countries around the world, not just colocation customers in the Southeast United States.

Base Blend Providers (included with every solution including colocation):
Level 3, Time Warner Telecom, XO, Comcast, GTT, Cogent, NTT, Telia Italia

xPublic Peering Fabrics — TiX (Tampa), TIE (Atlanta), Any2 (Los Angeles),
NOTA (Miami)

Private Network Peers – Our network peers with over 300 private networks including Amazon, Google, Yahoo and more.

Intelligent Routing Protocol (IRP) – Improves over 40,000 routes per day over standard BGP routing.

Carrier Neutral – With the unlikely chance our network blend does not suffice you are free to cross-connect to any of our on-net providers or we can assist you in bringing in someone else. With options ranging from: Brighthouse, XO, FiberLight, and Level 3

03 / OUR EXPERTISE

Because we support over 10,000 servers of our own you can find experts on site 24/7/365 with the following competencies: Linux, Windows, Virtualization, Hardware, Networking, and Firewalls

04 / OUR HARDWARE PROCUREMENT

Each year we spend millions of dollars on server, storage and routing gear with vendors like Dell, SuperMicro and Kingston. Tell us what you want and let us procure it for you at our volume discount.

05 / OUR HARDWARE REPLACEMENT

We have ample stock of the following items on-site available for purchase when you need something fast:

- RAM
- CPU
- Solid State Drives
- SATA Drives
- SAS Drives
- Motherboards
- Power supplies

06 / OUR HYBRID SOLUTIONS

Our collocated customers are welcome to take advantage of any of our other services, any of which can be cross-connected to your gear.
